PROFESSIONAL SUMMARY

Full Stack .NET Developer with 5+ years of experience building scalable, high-impact web solutions. Specialized in robust back-end development with .NET/C# and clean architecture, combined with modern front-end delivery using Angular. Proven track record in financial and fiscal domains, with hands-on experience in Microsoft Azure and CI/CD pipeline implementation.

WORK EXPERIENCE

Full Stack .NET Developer · Netspeed Tecnologia em Sistemas

Sep 2024 – Present

- Developed and maintained Faturei and Escrita Fiscal, multi-tenant fiscal document platforms serving 100+ registered companies, supporting high-volume issuance of electronic invoices (NF-e, NFC-e, NFS-e, CF-e) with high availability.
- Drove front-end and back-end evolution of Faturei, ensuring performance, stability, and regulatory compliance in a high-volume document processing environment.
- Generated and rendered electronic fiscal documents and DANFE reports using Stimulsoft from XML files, meeting Brazilian tax authority (SEFAZ) standards.
- Contributed to the migration of EscritaFiscalWeb from a legacy desktop application to a web platform, expanding the product's market reach and eliminating recurring stability issues from the desktop version.
- Supported the onboarding of 2 new developers, accelerating their ramp-up and alignment with the system's architecture.
- Built responsive interfaces using HTML, CSS, JavaScript, jQuery and Bootstrap, ensuring cross-browser compatibility.
- Wrote and optimized stored procedures, views, and queries in SQL Server, focused on data integrity and performance.
- Participated in Scrum ceremonies (daily standups and sprint planning), aligning technical deliverables with product priorities.

Freelance Developer & Independent Study · Self-employed

Jun 2023 – Aug 2024

- Worked as a freelance developer on small-scale web projects, delivering solutions for individual clients.
- Dedicated period to deepening technical knowledge in software architecture, Microsoft Azure, Clean Architecture, and modern .NET development practices.

.NET Developer · Ilia Digital

Nov 2021 – May 2023

- Built and maintained critical onboarding microservices for the ModalMais banking app, covering real-time document validation and credit score queries across external partners, a high-stakes flow directly tied to fraud prevention.

- Maintained and evolved ModalMais banking platform features, ensuring stability, performance, and low latency in a high-demand financial environment.
- Contributed to new feature development for the Cox Automotive project, aligning deliverables with product owner priorities.
- Implemented CI/CD pipelines with Jenkins and GitHub Actions, streamlining integration and continuous delivery workflows.
- Developed solutions using .NET Framework 4.8 and OracleDB in a corporate environment, focused on performance and reliability.
- Participated in Scrum and SAFe ceremonies (daily standups and planning), ensuring technical alignment with company priorities.

.NET Junior Developer · Cia do Credito

Jul 2018 – Feb 2021

- Designed and built CiaBot, an internal process automation solution that eliminated 1+ hour/day of repetitive manual work by consolidating data from multiple systems to support loan proposal analysis.
- Implemented a security dashboard integrated with 12 partner banks, automating password reset workflows that processed 100+ resets/day across multiple systems, eliminating manual intervention and reducing credential-related incidents.
- Led requirements gathering with operational teams, translating practical needs into high-impact automated solutions.
- Integrated REST APIs and SOAP services, connecting legacy systems with new applications efficiently and securely.

FEATURED PROJECTS

Inoova Solutions · inoovasolucoes.com.br

- Institutional website built with Angular 21, TypeScript 5, Tailwind CSS 4, AOS and EmailJS. Implemented standalone components, scroll animations, and a contact form with input masks.

Financial Box (in progress) · github.com/vnribeiro/FinancialBox

- Personal financial goal management system with transaction tracking, data validation, and report generation. Back-end available on GitHub. Capstone project for the Software Engineering degree at UniCesumar.

TECHNICAL SKILLS

Back-End: C#, .NET Core (3.1 to 10), .NET Framework 4.8, ASP.NET Core, Entity Framework Core, REST APIs, Microservices, Node.js, Express.js

Front-End: Angular (2+), TypeScript, Blazor, HTML5, CSS3, JavaScript (ES6+), Tailwind CSS, Bootstrap

Databases: SQL Server, PostgreSQL, MySQL, Redis, OracleDB, CosmosDB

Cloud & DevOps: Microsoft Azure (Service Bus, Monitor, DevOps), GitHub Actions, Jenkins, Docker, Git

Testing: xUnit, MSTest, Selenium

Architecture: Clean Architecture, CQRS, DDD, MVC

Methodologies: Scrum, SAFe

EDUCATION

Bachelor's in Software Engineering · UniCesumar

Mar 2019 – Expected: Jul 2026

Capstone Project: Financial Box (in progress)

Technical Certificate in Information Technology · Senac RJ

Mar 2017 – Aug 2018

LANGUAGES

Portuguese: Native

English: Professional Working Proficiency (B2)
